Ahmad Majid

Fullstack developer
London, United Kingdom

Summary

Passionate about technology, I have technical skills and enjoy
bringing these to creative people.
Completed a 9 week bootcamp at Le Wagon, which is now ranked
#1 coding school in the world. Interested in product, growth and
scaling operations.

Experience

Medico Legal Reporting Limited
Clinical Case Manager
February 2016 - Present
Midlands, United Kingdom

Worked with clients suffering from injuries. Conducted preclinical interviews
and wrote draft reports for medical expert.

Used effective communication in order to gain information necessary for report
writing. These reports would then be forwarded to solicitors and used in court,
and so must be accurate and clear. Worked within time limits in order to see all
clients before the medical examination.

Burslem Filling Station
Manager
June 2015 - August 2015 (3 months)

I mainly worked night shifts, and was required to deal with the stores
customers and finances. I had to manage the stock levels of the fuel, as
well as the items to purchase inside the shop. I also used my information
technology skills to record all sales in an an excel chart, and then used my
data analysis skills in combination with my awareness of market trends in order
to make a decision as to when to purchase new fuel at the lowest cost, without
running too low on reserves.

As I was sometimes the only member of staff in a store, I had to respond to all customers, as well as any possible complaints they might have, along with sales.
